

GU5.3 LED SPOT MR16 DIMMABLE

Produced according to the latest European energy-efficiency rules and with a very low energy usage combined with a high light output, this product fulfils the newest energy regulations!
All our GU5.3 lamps work on 12V and should therefore be combined with a 12V transformer.

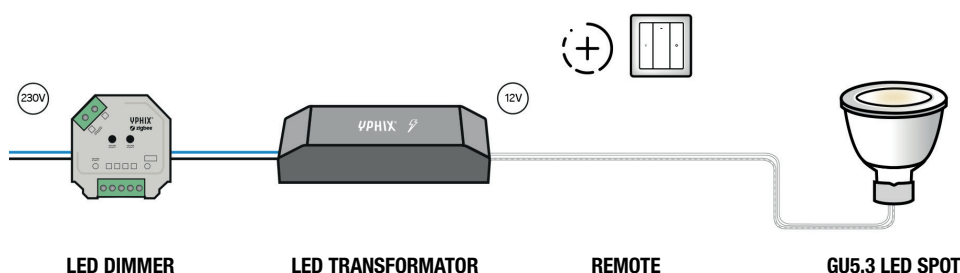

DIMMABLE WITH ZIGBEE

Choose the Yphix 230V wireless LED dimmer Zigbee to be able to dim your regularly dimmable lights smart. Easily controlled by an app with hub on your smartphone. Combine the Yphix 230V wireless LED dimmer Zigbee with a dimmable 12V DC transformer. It is also possible to add one of our wall remotes to your order, so the lights can be controlled without smartphone as well.
